PI500-C series

Air Compressor Inverter

Powtran technology
A manufacturer of motor control intelligent products and devices based on motor design.

www.powtran.com

PI500-C series air compressor frequency inverter is designed for screw air compressor process control by Powtran Technology. The controparameters are set directly through the keyboard of frequency inverter or touch screen, both the Chinese and English interface are available. The frequency inverter can realizes all the functions required by screw air compressor, simple and convenient operation, compact size with more powerful function, it can control the permanent magnet synchronous motor and asynchronous motor air compressor .

The PI500-C series frequency inverter was sucessfully used for the screw air compressor , it provides a more cost-effective way for the air compressor system, a variety of options, streamline the control system to reduce air compressor fault , but also provides a more convenient one-stop service, so that the installation and maintenance of screw air compressor become easy and fast

Technical Features

Excellent performance

- 1、 good load adaptability, control both AC asynchronous motor and permanent magnet synchronous motor ;
- 2、 unique double PID function for monitoring the current and pressure which makes the control more accurate, superior performance, more stable gas supply;
- 3、 wide voltage applicable: AC 380V (-15%) to 440V (+10%) performance characteristics.

Good operability

- 1、 integrated air compressor special interface, pressure feedback, temperature detection, loading control, fan control, alarm signal, etc., simple wiring , optimized cost control ;
- 2、 Bluetooth function, mobile monitoring and operation, good human-machine interaction; 3、 can be configured according to customer needs: air compressor Controller + frequency inverter, frequency inverter (including keyboard), touch screen + frequency inverter;
- 4、 Supporting PT100 and PT1000 temperature signal detection,user friendly.

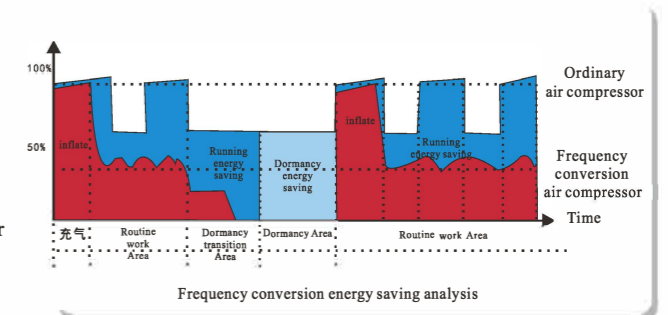

Optimized hardware structure

- 1、 independent duct design, fan detachable, easily maintain, good heat dissipation;
- 2、 imported paint for PCB board (moisture proof,corression proof, dust proof), can adapt to harsh working environment;
- 3、 wall mounted, vertical mounted, flange installation, more assembly options for customer; 4、compact size, reduce installation space.

Green energy-saving

- 1、 automatically adjust the motor frequency acording to the gas use amount, greatly reduce energy consumption, reduce electricity consumption;
- 2、 smoothly motor control for motor start and stop, low starting current to reduce the impact on the grid , reduce the impact of motor and other mechanical machine, extend the motor lifetime, reduce system noise;
- 3、 controllable sleep and wake-up function.

certification standards

products meet international standards:IEC 61800-3:2004+A1:2012
IEC 61000-6-3:2007+A1:2011

Hmi Control Panel (option)

1、 Perfect customer selection:

- 1) freely switch Chinese and English function version
- 2) Manual/automatic load and unload operation

2、 Detailed system display information

- 1) It includes all the normal control functions of constant pressure control of air compressor and the control of oil cooling fan
- 2) Air compressor constant pressure control dedicated PID, current PID control
- 3) The parameters of the frequency conversion unit can be directly modified and viewed through the touch screen
- 4) Contains system running state and frequency converter running state information
- 5) Intelligent sleep and wake function, energy saving effect is more remarkable
- 6) Three sets of system fault records can be recorded
- 7) Password protection design to protect user security

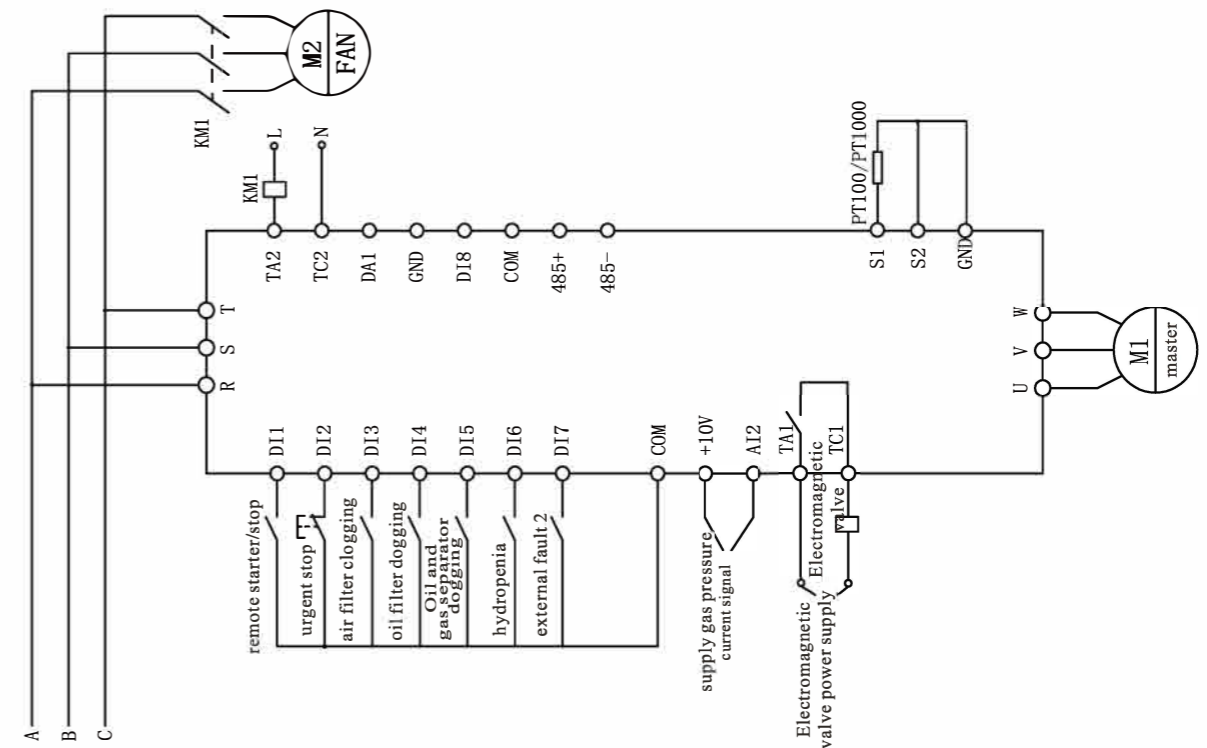

3、 Safety warning and alarm function

- 1) Warning state, only prompt warning does not affect the use
- 2) Alarm state, The electronic control system stops protecting immediately
- 3) Too high pressure, pressure sensor fault indication
- 4) Temperature too high, temperature sensor fault indication
- 5) Main motor fault indication
- 6) Phase sequence error, phase absence, fault indication for current detection

4、 Comprehensive maintenance information remind function

- 1) Air filter usage time record and maintenance remind, add block sensor signals
- 2) Oil filter use time record and maintenance tips , add block sensor signals
- 3) Oil and gas separator use time record and maintenance remind, add block sensor signals
- 4) Lubrication oil, grease service time record and maintenance remind
- 5) Machine system use time record and maintenance tips

Inverter system circuit drawing

Connection Diagram

Standard specification

Item	Function	Specification	
Power	Input frequency	50Hz/60Hz	
	Control system	High performance vector control inverter based on DSP	
Control system	Control method	V/F control, vector control W/O PG	
	Automatic torqueboost function	Realize low frequency (1Hz) and large output torque control under the V/F control mode	
	V/F curve mode	Linear, square root/m-th power, custom V/F curve	
	Over load capability	Rated current 150% - 1 minute, rated current 180% - 2 seconds	
	Maximum frequency	1、 Vector control:0 to 300Hz; 2、 V/F control:0 to 3200Hz	
	Carrier Frequency	0.5 to 16kHz; automatically adjust carrier frequency according to the load characteristics	
	Start torque	0.5Hz/150% (vector control W/O PG)	
	Torque boost	Automatic torque boost; manual torque boost 0.1% to 30.0%	
	Jogging control	Jog Frequency Range: 0.00Hz to max. frequency; Jog Ac/deceleration time: 0.0s to 6500.0s	
	Speed start tracking function	The motor in rotation can be started smoothly without impact	
	Built-in PID	Easy to realize closed-loop control system for the process control	
	Automatic voltage regulation(AVR)	Automatically maintain a constant output voltage when the voltage of electricity grid changes	
Personalization function	Air compressor special function	No-load dormancy and wake function, pressure setting value, cooling fan start and stop temperature closed loop, no-load frequency, no-load delay time, setting of dormant time, Load delay time, constant pressure control of air compressor, constant current control, start and stop control of electromagnetic valve, maintenance function of timing components, Current PID regulation	
	Self-inspection of peripherals after power-on	After powering on, peripheral equipment will perform safety testing, such as ground, short circuit, etc	
	Quick current limiting	The current limiting algorithm is used to reduce the inverter over current probability, and improve whole unit anti-interference capability	
Running	Timing control	Timing control function: time setting range(0m to 6500m)	
	Input signal	digital input	7 digital input terminals, compatible with active PNP or NPN input modes, in which one channel can be used for high-speed pulse input (0-100kHz square wave)
		Analog input	3 -ways analog input terminals (AI1, AI2, AI3), in which AI1 and AI2 can choose 0-10v or 0-20mA input, AI3 voltage is -10 ~ +10V input
	Output Signal	Relay output	Standard 2-ways programmable relay output, can extend 2 paths at most Contact capacity :3A/AC 250V, 1A/DC 30V
		Analog output	2-ways analog output(DA1, DA2), 16 signals can be selected such as frequency, current, voltage, PT100 and other, output signal range (0to 10V / 0 to 20mA).
	Running command channel	Three channels: operation panel, control terminals and serial communication port. They can be switched through a variety of ways	
	Frequency source	Total 10 frequency sources: digital, analog voltage, analog current, multi-speed and serial port. They can be switched through a variety of ways	
Protection function	Inverter protection	Overvoltage protection, undervoltage protection, overcurrent protection, overload protection, overheat protection, overcurrent stall protection, overvoltage stall protection, losing-phase protection (optional), communication error, PID feedback signal abnormalities, PG failure and short circuit to ground protection	
Display	LED/OLED display keyboard	Running information	Monitoring objects including: running frequency, set frequency, bus voltage, output voltage, output current, output power, output torque, input terminal status, output terminal status, analog AI1 value, analog AI2 value, motor Actual running speed, PID set value percentage, PID feedback value percentage
		Error message	At most save three error message, and the time, type, voltage, current, frequency and work status can be queried when the failure is occurred
	LED display	Display parameters	
	OLED display	Optional, prompts operation content in Chinese/English text	
	Copy parameter	Can upload and download function code information of frequency converter, rapid replication parameters	
Key lock and function selection	Lock part or all of keys, define the function scope of some keys to prevent misuse		
Communication	RS485	Built-in RS485 communication	
Environment Product standard	Environment temperature	-10°C to 40°C (temperature at 40 °C to 50°C, please derating for use)	
	Storage temperature	-20°C ~ 65°C	
	Environment humidity	Less than 90% R.H, no condensation	
	Vibration	Below 5.9m/s ² (= 0.6g)	
	Application sites	Indoor where no sunlight or corrosive, explosive gas and water vapor, dust, flammable gas, oil mist, water vapor, drip or salt, etc	
	Altitude	Below 1000m	
	Pollution degree	2	
	Protection level	IP20	
Product standard	Product adopts safety standards	IEC61800-5-1:2007	
	Product adopts EMC standards	IEC61800-3:2005	
	Cooling method	Forced air cooling
